Projects

1. Portfolio Website

Tools & Languages: React, JavaScript, HTML, CSS.

A fully responsive Portfolio to showcase my frontend skills, this portfolio is created with React Js and it is fully responsive as it works well on any screen size.

Git-hub - <https://github.com/Deepak-rajput8030/portfolio>

Live link - <https://deepak-rajput8030.github.io/portfolio>

Responsibilities:

- Designed and Developed the app in React.
- Used slick slider, JSX, like technologies and methods.

2. BeatBox : Music video Streaming Website

Tools & Languages: React, JavaScript, Firebase, Responsive Design, API Handling, HTML, CSS, etc.

This is a responsive, cross-platform web-based video streaming platform powered by YouTube, allowing users to seamlessly browse and search for content. Designed with a clean and intuitive interface, it leverages Firebase for backend services and authentication, including signup and login functionalities.

Live link - <https://beatbox-music-three.vercel.app>

Responsibilities:

- Learned backend integration with frontend with Firebase
- Handled database integration, backend services, frontend UI, deployment, and testing.
